PRESCRIPTION SAFETY EYEWEAR BY HOYA

FEATURING WILEY X BRAND SAFETY FRAMES

SafeVision is proud to partner with Wiley X, Inc. to bring you a wider selection of brand name prescription safety eyewear that meets both CSA Z94.3 and ANSI Z87.1 standards. As a Veteran founded & family owned business, Wiley X has spent decades innovating and refining protective eyewear. They employ the most advanced technologies to prioritize protection, durability and fit while adhering to the standards for impact safety.

This dedication helps Wiley X inspire confidence in everyone who wears their products – regardless of pursuit. Their commitment to your protection gives you the freedom to feel safe knowing your eyes are protected even in extreme circumstances.

SafeVision by HOYA lens limitations: Poly & Phoenix lenses ONLY | -4.00 to +3.00 | Single Vision & PAL designs only

POLARIZED SAFETY LENSES

Unlike tinted lenses, polarized lenses filter out glare caused by reflective surfaces. Snow, ice, water and even the road itself can cause hazardous glare which severely impact one's field of vision. That's why prescription safety sunglasses featuring polarized lenses are ideal for those who work outdoors and most especially when operating heavy equipment or driving. They also provide 100% UV protection for both your eyes and the sensitive skin that surrounds them.

HOYA PHOENIX LENS MATERIAL

Phoenix is a very strong and reliable material that is known for being the toughest lens material available. Plus it offers enhanced scratch resistance, optical clarity and it's the lightest option. Only Phoenix delivers on all these traits making it the ideal material for prescription safety eyewear.

- The lightest lens material available
- Resists chemicals known to crack poly lenses
- 60x more impact resistant than standard plastic
- Up to 20% thinner than standard plastic
- Provides 100% UVA and UVB protection
- Higher Abbe value of 43 vs. 30 for poly which means less color distortion in the periphery of lenses especially in large cut outs typical of safety frames

SAFEVISION 3 WRAP PROGRESSIVES

HOYA's best-in-class technologies and quality continue to advance progressive lenses.

SafeVision 3 applies HOYA free form backside surfacing technology to virtually any semi-finished single vision lens, in any material, allowing your practice to offer a greater selection of lens options. SafeVision 3 is also available to order in a wrap design making it an excellent option for safety frames.

Features:

-  Binocular Harmonization Technology
-  Free form backside surfacing
-  Wider & more stable viewing areas
-  Larger cut outs to fit safety frames

SafeVision by HOYA lens limitations: Poly & Phoenix lenses ONLY

SAFEVISION ANTI-FOG TREATMENT

SafeVision's state-of-the-art optical laboratory offers the latest in lens treatments including:

- Anti-Reflective front coating with an Anti-Fog back side coating.
- Clear Away Easy Clean, an oleophobic front coating, with an Anti-Fog coating on the back side.
- Anti-Fog front and backside coating.

We especially recommend adding an Anti-Fog lens treatment to safety frames that are close fitting due to high wrap like the Wiley X Active and Climate Control series.

Without Anti-Fog

With Anti-Fog

WX HELIX ACTIVE 6
